## BOARD OF TRADE ARRANGING FOR JULY 15th

The official opening of the Gleichen Irrigation system and the field celebration and Carnival in connection with the same to be held on July 15th is well under way. A public meeting in the Community Hall Friday evening resulted in a good turnout and most complete arrangements.

Every citizen is endorsing the event and is out to make it a day of real enjoyment to everyone. All kinds of games are provided for such as horseshoe pitching, bowling etc. A baseball tournament is to take place as an intertown event. There will be a chuckwagon race, barrel turning race, travois race, Indian display from the Blackfoot reserve. There will be sports for all the children. A merry-go-round will be on the grounds and in the evening a particularly good dance will be held in the Community Hall. It is expected that a brass-band will be in attendance during the entire day. A general committee of five members was appointed as follows:

A. R. Yates, L. Cuthbert, A. G. B. Lewis, G. Gorderham, T. H. Beach.

The following sub-committees are also functioning: T. H. Beach manager; J. Guttman, parade; J. A. Monard, midway; Rev. Davis, refreshments; L. Michael, water fountain; sale of tickets, L. Cuthbert, G. Gorderham, Indian display; D. McLeod, sprinklers; Bert James, R. Brown, M. Brown, dance; A. R. Yates speaker; T. H. Beach, advertising; Draw committee, Beach and MacCallum; Decorating, Phillips and Halstead.

It is expected that very prominent speakers will be selected to officially open the system by turning the water on in the waterfountain erected for the purpose. All in all, there will be fun and entertainment for everyone and a large attendance is expected to view this most unique system of irrigation which is the only one of its kind in the Dominion of Canada.

## A LITTLE EXCITEMENT

Saturday night about 10:45 the fire whistle blew to announce that Angus McLeay's car was on fire at Pete Deshayes gas filling pump. Pete managed to smother out the fire before the chemical engine arrived.

In the Community Hall a good sized crowd was witnessing the picture show and as all the doors of the hall were wide open, to let in the cool night air, the noise of the whistle in the hall was great. Everybody leaped to their feet and made one grand rush to get out the front door, and immediately got jammed in tight. Sergeant Tomlinson who happened to be present told the crowd to take their time which they did and were then able to untangle themselves and get out. Fortunately no body got hurt. Nobody, even those sitting close by thought of going out of the side and rear exit doors.

## WAR FULL OF FUN

Those rib-tickling funny men, Moran and Mack, the Two Black Crows, are doing their stuff all this Saturday, June 20th, in the Community Hall in "Anybody's War," a screamingly comical comedy-drama.

"Anybody's War" is the story of two Tennessee dinkies who are suddenly whisked into the excitement of the big scrap, and who encounter a number of amusing adventures in the trenches. The romantic interest is supplied by Neil Hamilton and Joan Peers, boy and girl from the same town in Tennessee who also become embroiled in the farcical struggle.

Others in the cast are Walter Weems, veteran blackface trouper and writer, as the sepia sergeant with the tough manners; Walter McGrail as the villain; Betty Farrington as a "cullud gal"; Charles Sellon and Guy Oliver.

The picture is based upon a novel "The Two Black Crows" in the A.E.F., by Charles E. Mack, leader of the famous blackface team.

## NAMAKA DISTRICT U.F.A. MEET AT DALEMEAD

A largely attended and very interesting meeting of the Namaka District Association U. F. A., was held at Dalemead, June 3rd, presided over by L. F. Pinkerton.

The outstanding features of the meeting was a short address by Mr. Buckley explaining the actions of the Legislature at the time he introduced his resolution asking for a Royal Commission to investigate the relations between the C.P.R. contract holders Association and the unfair criticism regarding the same by persons who do not know the facts.

Mr. C. Hornstra, one of the promising young men of our organization gave a well prepared and interesting address on "John Bright" and the economic conditions in England at that time.

The following resolution was passed, and sent to Hon. R. B. Bennett and our own member in Parliament.

"Resolved that this meeting of the Namaka, Gleichen District Association U.F.A. assembled on June 3rd, 1931 at Dalemead does commend the steady and persistent representation of agricultural conditions in Alberta made by members of the U.F.A. group at Ottawa and does express its conviction that these representations were made with due regard to all the facts. We further express our surprise that the Hon. R. B. Bennett, Premier of Canada, himself a citizen of our Province should make a statement to the effect that there was no hardship being experienced when men have not gone contrary to economic law.

We respectfully draw his attention to the fact that many thousands of farmers who have followed methods approved by agricultural and governmental authorities for a lifetime are facing difficulties and burdens of debt from which there can be no escape despite their most earnest efforts. The volume of unemployment in our cities is striking evidence of the fact that the troubles and difficulties of the farming community are being increasingly reflected in the entire life of the Province."

Mr. Priestly gave a very interesting address covering a wide range of subjects.

Stressing the spirit of friendship and co-operation of the U.F.A. in local affairs and pointing out the strength that we have maintained politically both in Edmonton and Ottawa.

How our members at Ottawa are either admired or detested in the East which shows that they are alive and take a prominent part in all proceedings.

The speaker also pointed out how the concentrated study of financial reform presents many difficulties in arriving at a solution of the problem.

Why co-operation is so strongly opposed by certain interests mainly because in co-operation the exploiter will have the minimum of profit.

He also stressed the duplication in service, under the old plan, that agriculture can not pay.

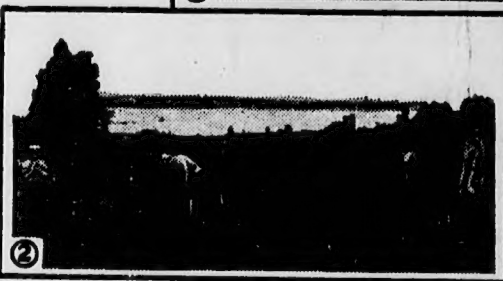

The musical part of the program was well taken care of by Messrs. Hornstra and Mrs. King and the culinary art of the ladies of the Dalemead U. F. W. A. should not be overlooked.

## THE TOWN LOOKS MUCH BETTER

W. W. Brown and his cement "busters," M. McMann, Geo. Rishaug and Laurier Brown, have made a wonderful improvement in the looks of the town. For the past several weeks they have devoted their time to breaking up and tearing down most of the cement foundations left after fire has destroyed the buildings on them. All together they gathered up some 137 wagon loads of broken cement and hauled them to the dam where they placed the blocks on the side of the dam where the water will rest. The reason for placing the blocks there is to break the force of the waves and keep the water from washing down the earthen wall. The foundations

## Golf Is Golf From Coast To Coast

Golf has assumed such important proportions in the life of modern every day life that it constitutes a very real phase of the activities of those who serve the public. The Canadian Pacific Railway is such a one and its train services to golf courses and established arrangements for guests at its many hotels to enjoy the game are the practical interpretation of its desire to maintain the traditions of 50 years of meeting the requirements of the Canadian people

and their visitors. From coast to coast, excellent courses are available and where the company does not operate its own links, playing privileges at first-class clubs are granted. In the Maritimes, there are courses at St. Andrews-by-the-Sea, N.B.; Kentville, N.S.; Digby, N.S.; and Yarmouth, N.S. all in connection with the company's hotels. Quebec City has two fine courses, one club dating back to 1874.

Montreal has the oldest club in Canada, the Royal Montreal, founded in 1873, which today boasts two championship 18-hole courses. Other Clubs are numerous and good. Toronto, too, has many excellent links, including the Royal York Golf Club, where guests at the Royal York Hotel have playing privileges. Ontario abounds in courses, all along the Canadian Pacific's lines. Bungalow camps at French River and Kenora (Lake of the Woods) have sporty 9-hole courses for their patrons. Throughout the Prairie Provinces, golf is available at all the larger centres, while the Banff Springs Hotel Golf course is among the best in the country in settings of unrivalled mountain scenery. It is the Mecca for golfers from all over Canada and the United States, to say nothing of the numerous overseas visitors who play it each summer. Vancouver and Victoria offer ready hospitality, the latter standing unique among Canadian golf centres, in that the game is played throughout the 12 months of the year, the annual mid-winter tournament for the E. W. Beatty Challenge

were taken from the old Leggat store which was burned down some 10 years ago. Also cement was taken from Jack James property directly back of the Call Office. Jack had a barn there which went up in smoke some 20 odd years ago, with a large number of horses. The next place Brown cleaned out was the site of the old Gleichen Opera house. All the cement walls have disappeared and all that remains is the basement hole and the cement floor therein. Given a few dust storms like we had this spring and this scar on the town streets will soon disappear. So let's take our hats off to Brownie and his cement jugglers.

## NAMAKA NEWS

Mrs. Mertgen was a Calgary visitor this week.

Mrs. Somerville and daughter Peggy; Mrs. L'Heureux and Mr. A. V. Manby of Cluny called on Mr. and Mrs. A. Ley on Saturday evening.

Mr. Ray Baker, of Calgary spent Sunday with his parents here. Several Calgary friends accompanied him and were also guests of Mr. and Mrs. Baker.

The game of soft ball is gaining quite a hold upon the people of the village and surrounding country. We notice that both young and old are participating in the evening games.

Miss Mary Scheer presented her piano pupils in a pleasing recital Thursday evening in the I.O.O.F. Hall. A large audience greeted the performers, who played with artistic skill and interpretation throughout the program. Miss Jean Thomson assisted with a delightful reading, also other local artists contributed musical numbers. At the conclusion of the program, Miss Scheer was presented with a beautiful bouquet of roses and

carriages, by the Namaka Ladies' Aid, also prizes were distributed by her to several of her pupils for their year's work. Those taking part in the program were, Hazel Wegener, Florence Harwood, Annie McGregor, Millie Bremner, Viola Praeker, Ivy Watts, Norma Scheer, Florence McKeen, Connie Bremner, Merle Buker, Mary Louise McBean, Louis Peterson, Jean Thomson, Grace Scheer, Mark Brown, Mrs. Geo. McBean.

## HEARD AND SEEN AROUND THE GANGS

Jack Lester foreman of the Gleichen Foreign Legion should have the following signs up along the irrigation trenches:

Danger! Men Working!  
Danger! Men not Working.

Plumbers laying the pipe are like other plumbers. The ordinary plumber has to go back for his tools but our town plumbers are continually going back for pipes and fittings. Pete Rishaug chauffeur and Jim Young traffic manager, Bill Hamar general superintendent.

A. J. Robinson says he could do the work in half the time.

Bill Taylor and Ed Elliott are our non stop record breaking pipe layers.

Councillor Moss of the Public Works committee of the Town Council is a busy man these days. Not much beer but lots of irrigation. He says Percy Williams (M. Murray) will get a good holiday when it is all finished.

Bill Varndell and Ernie Woods are on the water wagon watering the trees again.

L. Michael advises everything going along fine. Pipe should all be

laid by the end of the week. The pressure tank has not arrived yet but he will be ready to set it up as soon as it comes.

The reservoir is almost ready to have the water turned in. The Calgary Power Co. advise that construction gang will be at work and job completed this week.

L. Michael and Bert are not even on speaking terms now. By the time the irrigation project is finished there will be others who will be unable to speak.

Mayor Yates hair has turned a shade grayer since the irrigation project started.

Jack Lester is getting some deep lines in his face hiring men one day and firing them the next. He also has to listen to the woes of the local unemployed trying to get another man's job.

Ed Taylor was out at Bill Ferguson's on Sunday getting accustomed to irrigation. Bill says Ed must have carried away half the farm on his feet and legs.

## NEWS

Pete Deshayes says there is a good place to sit in front of Fred Jones store on these hot days. Fred tells a funny one now and again.

What about the unemployed. Watch the chain gang work.

Rupert Hunter tells some good ones too in the back of the garage.

Hugh James is almost as good as Rupert now. He has had a good training in the story profession.

The lawn in front of the town office is looking fine in spite of the dry

## CHAMBER OF COMMERCE TO HOLD PICNIC

A special meeting of the executive of the Chamber of Commerce of Gleichen and District was held at the home of A. F. Wilson with the following present: N. T. Purcell, Pres. A. F. Wilson, David McBean, A. Buckley and W. Sutermeister, sec-treas.

It was decided to hold a "Goodwill Picnic" at the Bow River on August 12th. The site will be selected near the Arrowwood bridge over the Bow River, and the time has been set at 2 p.m. J. E. Ostrander and A. F. Wilson were appointed a sports committee. N. T. Purcell and A. Buckley are placed in charge of supplies such as coffee, tea, cream and sugar. W. Sutermeister was appointed to arrange transportation for those who have no way of going and also to take charge of the necessary publicity. The various U.F.A., U.F.W. A., and Board of Trades organizations of the surrounding towns and district will be invited to participate in the picnic. It was suggested that the bachelors be asked to provide for sugar, coffee and tea; everyone else will bring lunch for themselves and one or two extra. David McBean will provide boilers etc., and be in charge of fires. Supper is to be held at 6:30 p.m.

The question of an irrigation school to be held in Gleichen next winter was also discussed and arrangements will be made in due time. The meeting then adjourned.

weather. See what irrigation can do.

H. Schnepf wonders why he isn't working. Some fellows are on the job every day.

Crops are looking fairly good but we need a good rain. It is surprising what we can grow without rain.

J. J. Robinson and W. H. Palmer's cars tangled one day last week, at the corner of Sixth Ave., and Gleichen street. Result, Jack lost a hind wheel.

Talk about speed, Percy Williams (M. Murray) planted his garden one day and it was up two days later. Explain Percy.

## GLEICHEN BASEBALL BOYS PLAY PERFECT GAME

At Cluny last Friday evening Gleichen and Cluny played baseball Gleichen winning 7-0. On the part of Gleichen a perfect game was played allowing no hits, no runs and no errors. Gleichen's sensational pitcher Cliff Bogstie on the mound and Jack McArthur behind the bat.

Fourteen men were struck out, not one man reached 1st base, not a single ball going to the outfield. Clifford is in his nineteenth year and was raised and schooled in his pitching in Gleichen. He is left handed and has now won nine straight games for Gleichen. He is making a name for himself and is putting the Gleichen baseball team on the map. The Gleichen boys have now won ten games in succession and have lost none. They have played Arrowwood twice, Cluny three games, Mossleigh twice, Rockyford two games, Calgary Boosters one game and have won them all, and the season has only just started.

Gleichen China boys are now taking an interest in the town. Both Jun Kee and Charlie Tia's restaurants have had their roofs painted black.

Meadowbrook ball club played ball Sunday at Rockyford and won by 9-2. A large crowd witnessed the game.

Pack up your troubles! Those tired comedy men are here again!

### The West's Besetting Sin

If there is one besetting sin indulged in by the people of Western Canada it is the sin of impatience. Living in a new country, a country which fifty years ago was given over to roving bands of Indians and immense herds of buffalo, our people today, expect and demand all those services and conveniences which it has taken centuries to build up and develop in older lands. It is a good fault to want the best there is in life for our children; it is a laudable ambition to work to secure such things; a proper spirit of discontent is all right, provided it is a proper spirit.

But in a vast extent of territory over which population is as yet but thinly spread, where the element of time has not yet permitted that degree of productive development which leads to the accumulation of certain reserves of wealth, for people to expect to enjoy all those things which it is possible for older countries of large populations and centuries of accumulations to provide for their people, is not reasonable. Whatever we have must be paid for, and if in the West we have not sufficient people nor sufficient wealth to pay for what we want, we must of necessity go without until such time as we are able to provide them. And to be discontented with our lot in the meantime is neither reasonable nor right.

For example, Good, all-weather highways to serve all parts of Western Canada is the desire of everybody; it is a laudable desire. Efforts to realize it are being put forth, but people are impatient, and demand still larger programmes of construction, notwithstanding the fact that it is taxing their resources to the utmost to pay interest charges on past construction and finance the carrying out of existing programmes of new construction.

There is nothing to be gained, and much to be lost by having the whole country criss-crossed with good roads, provided with telephone and electric power services, equipped with churches, schools and hospitals, and other services and conveniences now so generally regarded as necessities, if as a result of providing them the burden of taxation is so heavy as to drive the people off their land. All these things are worse than valueless if the people cannot maintain an existence to enjoy them.

To cite another example. Within the past two years there has been erected and equipped, in the Province of Saskatchewan, three technical schools, one at Regina, a second at Moose Jaw, less than 50 miles distant, and a third at Saskatoon, 150 miles away, each of which has cost half a million dollars, or a total of \$1,500,000. This large expenditure for purely technical education has been made in a Province where over 70 per cent. of the population lives in rural communities, and where constant stress is laid on the importance of educating the youth to remain on the land.

The point is not that technical schools are not good and desirable things. No, the point is, are we not aiming to provide these good things before we can afford to do so, and, to the extent that we mortgage our future in this way, are we not crippling our own efforts to provide and maintain something else much more essential and which would benefit a much larger percentage of all the people who have to bear the taxation burden? Are we not trying to ape other and older lands in our impatience to have everything they have, which no doubt they can afford now after long decades of growth, but which we cannot afford because we are not numerous and wealthy enough to carry the resultant financial burden.

Few men and fewer women there are but would like to live in a better house than they now occupy, if they could afford it, but knowing they cannot afford it they make the best of what they have. Many of them could have the finer house of their dreams if they were prepared to mortgage their whole future for it, and, while living in it, denied themselves other things and lived in a state of worry over the payments to be made.

The country is just an aggregation of individuals. They can have those things they are impatient to possess largely because other countries have them, but if in their impatience, and unwillingness to wait until they occupy much the same position as those others who can afford these things, they plunge ahead and get them, then they must not be impatient of the taxes they are called upon to pay, nor resentful if, being unable to pay, they lose all they had accumulated in years gone by.

It is in times like these that heed should be given to such matters. The present is hard for most people, and in no small degree because of the mistakes of past, made individually and collectively. This present depression will pass; good times will come again. We must willy-nilly be patient now. But will the old impatience come back with renewed force? Will we as a people still insist on running before we really are able to walk? If so, we will stumble again and fall once more.

### Rubber Lining Protects Steel

#### Perfect Surface Resists Abrasion Under Most Severe Conditions

When chemists discovered a method for attaching a rubber lining to a metal surface, they presented a new and valuable material to the chemical engineer for use in the vats, tanks, pipes, pumps, and so forth, in which he handles corrosive liquids. The rubber lining effectively resists the action of acids which would soon eat through the steel. Now this process of attaching a rubber surface to metal has been perfected to a degree which encourages its use to resist abrasion in some of the most severe service conditions imaginable.—Popular Science.

Italy has a football craze.

### Dust Explosions

#### Warning Is Given Of Danger Lurking In Talcum Powder and Cornstarch

Don't light a cigarette just after using talcum or any other powder. Never leave the cornstarch box, the flour tin or the oatmeal bag where they are likely to fall. That is, if you want to avoid the chance of an explosion.

These hints on dust explosions were given recently by David J. Price, chemical engineer with the United States Department of Agriculture, who was a delegate to the annual convention of the National Fire Prevention Association in Toronto.

He was pointing out that dust explosions were not confined to grain elevators as was commonly thought.

### Was Weak and Run Down Could Scarcely Do Housework

Mrs. Edward A. Allen, Bezonson, Alta., writes:—"I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework, in fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The S. Milburn Co., Ltd., Toronto, Ont.

### Greetings To Boy Scouts

#### Stirring Messages Sent Out From Earl Beesborough and E. W. Beatty

Stirring messages went forward recently to the Boy Scouts of Canada. One was from the Earl of Beesborough, Governor-General of Canada, on his assuming the position of chief scout for the Dominion. The other was from E. W. Beatty, president of the Canadian Pacific Railway, who recently became the first president of the Boy Scouts Association.

The Governor-General said: "I am eagerly looking forward to having many occasions for becoming acquainted both with Canadian scouts and Canadian scouting and of observing their progress." He was pleased that Mr. Beatty had consented to undertake the duties of president of the association.

Another name for a good citizen is "a good scout" wrote Mr. Beatty. "It is gratifying to think that so fine a movement as that of the Boy Scouts has captured the imagination of the youth of the world and has become so truly international," he said. For Canada it is peculiarly fitted, as the campcraft which it teaches is so well suited to our geographical conditions. Nothing could be better than its gospel of self-reliance, self-respect, unselfishness and the pledge to help others whatever it may cost."

### SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an important dress—lost color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes."

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never spot, streak or run; and friends never know the things I dye with Diamond Dyes are redyed at all."

Mrs. R. F., Quebec.

### Unusual Cafe In London

#### Automatic Machines Will Serve Meals In Record Time

Five-minute meals will be the order of the day when London's latest speed restaurant is opened in the Strand.

No dish will cost more than sixpence, and all foods will be served through automatic machines. Soiled plates will be slipped into letter-box-like slots, and there is an ingenious arrangement by which customers can wash and sterilize their own glasses. "Soft" drinks, supplied through automatic machines, may be aerated if desired.

Customers simply slip their still drinks into a little machine, press a button, and the "still drink becomes sparkling." Because of regulations alcoholic beverages cannot be supplied through an automatic machine, and a barman has been employed to look after this department. Here, also, the highest price will be sixpence.

The restaurant is to be open day and night, week days and Sundays.

### World's Smallest Dog

The world's smallest dog is said to have been acquired by the Maritzburg Museum. It is a dwarf brown and white pointer, and although it lived for three years it never grew longer than six and half inches from nose to tail tip. His head was one and a quarter inches long and an inch broad, and his hind legs were slightly less than two inches long.

**Asthma Is Torture.** No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

### Well-Protected Animal Park

Elk Island National Park in Alberta, which contains one of the Government buffalo herds, is entirely surrounded by thirty-four miles of nine-strand buffalo-proof wire fence; fireguards, sixteen feet in width, are ploughed about the park, both immediately inside and outside the fences.

Someone has succeeded in carving 100 words on a grain of rice. We are in hopes it includes directions as to how to cook it. So few people can cook rice.

"Bumpy" air shocks an aeroplane harder than the bumps of fast landing, tests show.

W. N. U. 1891

### LIKELY FLIGHT CANDIDATE

Laura Ingalls, stunt and cross-country flier, whose intensive flight and navigation training activities at Roosevelt Field, New York, gives rise to the belief that she will vie with Ruth Nicholls for distinction of being first woman to make solo trans-Atlantic flight.

### Canada Should Have Right To Amend Constitution

#### Conference With Provinces May Be Called To Discuss This Matter

A resolution declaring that Canada should have the right to amend her own constitution, moved in the House of Commons, brought from Hon. Hugh Guthrie, Minister of Justice, the statement that he favored a conference with the provinces on this important matter. Before calling a conference, however, he thought that a committee of parliament should be appointed to consider this question.

"I am by no means hopeless of the situation," Mr. Guthrie declared to the House. "I am entirely hopeful, and I think it would be well for this parliament, if not at this session, at some subsequent session, to appoint a committee especially charged with the consideration of this question. We must prepare our case here before we call a conference, and it is a case that will require a great deal of preparation."

"After preparation had been made," added Mr. Guthrie, "I shall heartily favor the summoning of a provincial conference with the Dominion authorities to see what plan can be worked out so that in the future this parliament may be able to make the necessary amendments to our constitution."

### Were Warned In Time

#### British Visitors To Argentina Narrowly Escaped Giving Offense

All unknowing, some of the British visitors to the Buenos Aires Exhibition would have given offence to the Argentine hosts if they had not been warned in time, it is stated. Arriving after a sweltering passage across the Equator, they prepared to land at Buenos Aires in white flannel trousers. "For heaven's sake, go back and change!" said the English friends who met them at the quay. "This isn't a black man's country." South Americans—even the Brazilians, whose land lies right on the line—are very touchy about these questions of costume. "No one would think of walking down Piccadilly or along the Paris Boulevards in white flannels," they say, "so we'll observe the same code."

**Miller's Worm Powders** are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonic in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

### An Odd Electrocution

Physicians at Fergus Falls, Minnesota, said that Wilbur Thompson, 30, highway workman, was killed by an electric shock, although his body did not come in contact with any electricity. Thompson was driving a grading machine beneath a heavily charged power wire on a highway near here. The current jumped from the wire to the metal button on Thompson's cap and electrocuted him.

### TO KEEP THE Children Healthy

When they're "off colour" give them Dr. Carter's Little Liver Pills. Safe, acting gently on the bowels and liver, they soon bring back smiles and high spirits that healthy youngsters should show.

### The Child Grows and Matures

#### Necessity Of Careful Training In Early Childhood

(By John Burke Ingram.)

I once knew a boy who was unreasonably afraid of a policeman. Unreasonably because he was a good little boy and his family were decent people. One day that little boy's grandmother told him a story about another little chap who got lost and of how a policeman on the boat found him and took him home to his mother. This simple story completely destroyed the child's fear of policemen. It made him ready to understand that the policeman was on "his side" and his duty was to protect him and his mother and father against people who were not willing to behave themselves.

I introduce this question because it illustrates the necessity of teaching a child carefully, if he is to be a healthy citizen and a good citizen. There are so many things the parent should do; simple in themselves, if he or she will only take the trouble to do them, it may assist the growing child to be both.

Lying is a problem, and many a conscientious mother has had her heart almost broken because little Bobby sees all sorts of horrible accidents and sees tigers walking down the street, and, perhaps, if he is a belligerent little boy, is continually thrashing six big men on the way home from school. Lies like that, however, are, in the main, quite harmless and if it were not for this capacity for harmless lying, there should be no books written, nor pictures painted, nor music written. Of a different story however, is the lie which is told to avoid punishment, or to secure some favour, a personal lie in other words, and these must be stopped. It is easy to draw a distinction between a "fairy tale lie" and a "wicked lie," and in combating the lie a positive worship of truth may be included as a preventive. Stories of men who refused to lie even if it meant pain or death, will be listened to eagerly, for children are natural hero-worshippers and it is a good thing if a parent has imagination enough, and interest enough to place worthy objects of hero-worship in the mind of the youngster. We are getting away from our old ideas that children should be seen and not heard, and that a child should never have his own way just as a growing plant has its own way, to push its head towards the sun. But once again, to remain for a moment in the vegetable kingdom, as the tree is bent the twig's inclined, and a really tactful and understanding parent will get a child's efforts into the right channel so tactfully that the youngster will scarcely realize that it is not his own ideas that he is carrying out.

**It Bids Pain Begone.**—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

### Recipes For This Week

(By Betty Barclay)

#### GOLDEN COCONUT SHORTCAKE

8 thin slices sponge cake.  
 Orange sauce.  
 3 oranges, sections free from membrane.  
 ½ can coconut, southern style.  
 Allow two slices sponge cake for each serving. Place first slice of sponge cake on plate, cover with orange sauce, orange sections, coconut and additional orange sauce. Cover with second piece of sponge cake and top with orange sauce and orange slices. Sprinkle with coconut. Garnish with whipped cream around base if desired. Serves 4.

#### STRAWBERRY WHIP

1 package strawberry-flavored gelatine.  
 1 cup boiling water.  
 1 cup strawberry juice.  
 1 cup strawberries, crushed and drained.  
 ½ cup sugar.  
 Dissolve gelatine in boiling water. Add strawberry juice. Chill. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in strawberries and sugar. Turn into mold. Chill until firm. Unmold. Serves 8.

#### Protection For Miners

Safety caps and safety shoes are soon to be added to safety lamps as standard equipment in the Cape Breton collieries. The caps are of metal and are designed to protect the head from frequent bumps. The shoes will protect the feet from falling stones.

The sound made by dropping a pin was recently broadcast.

## Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

**ENO'S FRUIT SALT**

### Solves Brooder Question

#### British Columbia Woman Uses Heated Pail For Mothering Chicks

Mrs. Mary Dawzy, Vancouver, B.C., has a plan for mothering baby chicks without expensive mechanical brooders and clucking hens.

For a small number of baby chicks Mrs. Dawzy puts in their pen a tin pail containing hot water. Over the pail she wraps an old sweater.

"The baby chicks snuggle up to it and do very well," says Mrs. Dawzy. "I use a large lard pail usually for less than twenty chicks. If I have more than twenty, I sometimes use two pails, placing them in the corner always so that they may not be upset."

At frequent intervals Mrs. Dawzy renews the hot water in the pails. She uses the tin and water mothers until summer comes and then the chicks take to the roosts.

"They're much better without a real mother fretting over them," she says. They learn at an early age to rustle for themselves."

### The Loser's Move

In a newspaper appeared the following advertisement: "The man who picked up my wallet in Fore Street was recognized. He is requested to return it." The next day this reply was published: "The recognized man who picked up your wallet requests the loser to call at any time and collect it."

### Largest Persian Rug

What is said to be the largest Persian rug in the world is rapidly taking shape in New York. It is being built for the main lobby of the new Waldorf-Astoria Hotel and will be more than 70 feet long and nearly 50 feet wide. The design to be followed is that of a Persian garden.

A stream flowing through Piccadilly was the source of water supply for Londoners in the early part of the thirteenth century.

A sea plane that can be quickly folded up and carried on a submarine has been tested by the U.S. navy.

### Better Fire Protection Needed

#### More Organized System For Rural Districts Is Stressed

A more organized system of fire protection in rural districts was urged recently by David J. Price, of Washington, D.C., chief engineer of the Bureau of Chemistry and Soils, U.S. Department of Agriculture, addressing the annual convention of the National Fire Protection Association in Toronto.

Fire loss on farms in the United States last year, was the greatest ever experienced, he declared. From data available, it appeared that farm fire losses increased 25 per cent. during the 1930 season drought, he said. The loss for the year was estimated to be in excess of \$125,000,000.

Spontaneous heating and ignition of agricultural products constituted, he said, one of the prominent causes of farm fire loss.

### Wrong About India

#### Randolph Churchill Says People Of United States Think Gandhi Is A Saint

Randolph Churchill, son of the former chancellor of the exchequer, said on his return from a lecture tour in the United States, that the people of that country hold "perverted ideas" concerning India.

"They imagine the position of India today as being exactly analogous to that existing in 1776, in the United States," he said. "Mr. Gandhi is made a great fuss of and they all think he is a saint. As far as I know, he is the only man ever canonized by newspaper propaganda."

### Receives Medal

Wing Commander Charles Kingsford-Smith was awarded the Oswald Watt medal for the most conspicuous feat performed in 1930 by Australian-born fliers. The Australian Aero Club selected him for his flight from Dublin to Harbor Grace, Newfoundland, last June.

One reason why the scenery seems more wonderful in Europe is because you don't have to read it.

## Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

## Would Abolish War

### House Of Commons Sets Approval On Act Framed By League

The House of Commons with one accord took another step towards abolishing war. It passed without division the resolution submitted by Premier R. B. Bennett approving the accession of Canada to chapters one, two, three and four of the general act framed by the League of Nations in 1928. This act provides for the pacific settlement by arbitration of international disputes not justiciable by the world court.

The five reservations to the act decided upon by nations of the British Empire were explained by Mr. Bennett. The very nature of democracies was opposed to the maintenance of militarism, he declared, in explaining that he did not propose to discuss the desirability of international peace generally.

Approval of this resolution and acceptance of arbitration as the means of settling disputes cleared the way, said Hon. Ernest Lapointe, former minister of justice, for the great meeting next February for the disarmament of the world. He heartily supported the resolution.

Henri Bourassa (Ind., Labelle), also endorsed the resolution, although he thought some of the reservations could just as well have been dispensed with. In regard to the reservation that disputes between nations of the British Empire which are members of the League of Nations shall be settled in a manner the British nations shall decide upon was proper and a tribunal within the Empire should be established to hear such disputes.

### Not Handicapped By Illness

#### Invalid For 22 Years, Miner Kept Cheerful and Busy

For 22 years George William Hodgson passed his life in a spinal carriage, following an accident in a pit in 1909, yet he was never known to grumble, and was never seen without a smile.

Whole-hearted tributes to his fortitude and cheerfulness were paid by colliery officials and others at the inquest on his recent death, attributed to the accident 22 years ago. Hodgson was a familiar figure in the village of Woodlands, England. In fine weather he used to go out in his carriage, which he manipulated himself, taking with him one or two blind friends, who were guided by holding the rail at the back of the chair. He knew every lane and road in the district, was a keen follower of football, a proficient concertina player, an artist, and a maker of wireless sets and fishing tackle, all of which accomplishments were self-taught.

There are now more than 290 persons living on Robinson Crusoe's Island.

England now gets nearly half of its meat and poultry supply from foreign sources.

## CORNS

Lift off - No Pain / QUICK RELIEF

Just a drop or two of Putnam's on any sore corn and out comes all the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

**PUTNAM'S**

W. N. U. 1891

## H.B. Insurance Rates

### Marine Rate For Vessels Operating To Bay Fixed At 8 1/2 Per Cent.

The second report of the Imperial Shipping Committee on Hudson Bay marine insurance rates for 1931 says it is understood the Canadian government intends to open the port of Churchill for traffic next September. "Since the grain elevator apparently will not be ready before September 15, and as only a portion of the wharfage accommodation will be completed, it is evident shipments of grain from Churchill must be limited during 1931 to a few vessels only," the report declares.

The report also says the Joint Hull Committee has agreed to reduce the rate of the additional premium for suspension of the North America warranty with respect to vessels passing Cape Chidley inwards on and after August 10, and leaving the last landing port in Hudson Bay on or before September 30. The reduction will be from 60 shillings to 50 shillings per hundred pounds insured value, plus two shillings per ton on gross registered tonnage.

The committee also agreed to extend the limit for sailing from Churchill to October 7 for a 10 per cent. increase on the above rate, and will permit a further extension up to October 15 for a 25 per cent. increase on the above rate. Rates are only to be regarded as current for the 1931 season and are the minimum figures. Underwriters reserve the right to quote a higher rate for any vessel below proper standards of efficiency.

Canadians should accord all possible publicity to the facilities available to Churchill for discharging, loading and anchorage before the opening of the 1932 season, the report says, because it may affect the rates of additional premiums recommended by the Joint Hull Committee for that season, and also because the possibility of demurrage must be taken into account in finding charters. The report concludes that the rate for pilot service to take vessels through Hudson Straits would at least be prohibitive, and suggests a more thoroughly detailed survey of the Straits.

## Accident Prevention Week

### Manitoba Sets Aside Week To Concentrate Public Attention On Need Of Prevention

When a province with the population that Manitoba has faces an annual loss of 151 lives and over 10,000 injuries through accidents of various kinds, it is time that some organized effort was made to reduce this heavy drain on life and limb, particularly because many of the accidents could and should be avoided. The above is a statement made by the Accident Prevention Bureau of the Winnipeg Board of Trade in inaugurating "Accident Prevention Week," observed from May 17 to 24. The purpose of the campaign was to concentrate public attention upon the need of prevention of accidents, the enforcement of the law where criminal negligence causes accidents, and the education of the people with a view to proving that accidents can be prevented.

The Manitoba Government, Manitoba Motor League, Manitoba Associated Boards of Trade, The Winnipeg Board of Trade, The Manitoba Boy Scouts Association, Employers Association, Winnipeg Builders Exchange, Winnipeg School Board and the Ministerial Association, actively participated in the campaign.

Each day in the week was devoted to some particular phase of "Accident Prevention," and the days were set aside as follows: Sunday, "Safety Sunday"; Monday, "Safe Driving Day"; Tuesday, "Safe Walking Day"; Wednesday, "Industrial Safety Day"; Thursday, "Home Safety Day"; Friday, "Child Safety Day"; Saturday, "Community Safety Day."

### Business Was Good

"I've been putting on weight, and this dress suit is rather too tight for me. Could you let it out?" said a man to a friend who occasionally did a little tailoring in his spare time.

"I've never done such thing," was the reply, "but I'll see what I can do."

A week later the man telephoned to ask how his suit was getting on. "Better than I expected," said the friend. "I've let it out to four men this week!"

### Manitoba Butter

M. A. Gibson, provincial dairy commissioner, states that since 1915, nearly \$20,000,000 worth of creamery butter has been shipped out of Manitoba, the peak being reached in 1925, when 260 carloads, valued at \$2,007,600, were shipped. This year 60 carloads have been shipped to the Toronto market where Manitoba creamery butter commanded a premium over the local product.

## Canada Will Continue To Prohibit Liquor Export

### Gesture Of Goodwill To United States Still Holds

Canada will continue to prohibit the exportation of liquor to United States. The House of Commons turned down a resolution sponsored by Col. S. C. Robinson, Conservative member for West Essex, which would rescind the prohibitory law passed early in 1930. When the Speaker called for an indication of numbers from those supporting the resolution there was a faint response. Volume from those opposed, however, was thunderous in comparison, and the Speaker ruled the resolution lost.

Col. Robinson, only member to speak in the discussion, made no attempt to force a registered vote.

"The United States is still getting her liquor, and Canada is losing the revenue," declared the border member. He estimates the loss in revenue to the government, together with the industrial loss to the country at \$29,453,000 since Canada made the "gesture of goodwill" to United States. The loss of revenue was placed in excess of \$9,000,000 a year, while loss of business for distilleries, brewers, farmers, bottle manufacturers, printers and railways made up the balance.

The agreement between Canada and the United States on immigration matters had been "treated like a scrap of paper" by United States, Col. Robinson contended. United States, he proceeded, had shown "no good-will toward Canada in the drastic action of coastguard ships firing on Canadian vessels, sometimes with loss of life."

## World's Wheat Acreage

### Considerable Reduction Is Indicated For This Crop Year

Reduced wheat acreages throughout the world this year as compared with last are dealt with in the monthly review of the wheat situation released by the Dominion Bureau of Statistics. Reports from United States indicate a reduction in durum acreage by 24 per cent. and other spring wheat acreage by 12 per cent. The reduction in spring wheat acreage in Canada is estimated at eight per cent. Reductions are also expected in other wheat-producing countries.

"For Australia," the review continues, "a cable from the International Institute of Agriculture forecasts the acreage to be seeded this season at 13,500,000 acres, which is a significant reduction from the 1930 acreage of 18,160,000. The agricultural commissioner of the United States Department of Agriculture, at Sydney, expects the wheat acreage to be 30 per cent. less than last year. This would amount to 12,700,000 acres. Since Australian seeding operations may extend over a long period and well into the month of June, it is likely that the actual acreage will be higher, rather than lower, than the forecast."

Despatches have forecast lower acreage in the Argentine. For Russia, reports indicate at April 20 only 8,201,000 acres of spring grain were sown, against 50,870,000 acres up to the same time last year. Seeding is particularly backward in the Ukraine. A Broomhall despatch, May 9, said 84,000,000 acres spring grain were sown compared with 90,000,000 last year.

## Simple Thing Proved Dangerous

### Gas Produced From Corn Cob Dangerous As Mustard Gas

Few have seriously considered the corn cob. Still fewer have delved into its possibilities. Yet for all its bucolic innocuousness the corn cob has been found to be potent in a quality that immediately elevates its status from one of humility to a position of dreadful command. Two scientists experimenting at Iowa State College in search of a compound with which to brand hogs, discovered in the course of their tests with the corn cob that it can produce a gas as poisonously deadly as the mustard gas made famous during the great war. The modern corn cob must have been slightly astonished at the impressive name given its new side line—that of chloroethyl-2-furfuryl-sulfide. Curiously enough, another by-product of the corn cob is charcoal gas, which might be used in gas masks to counteract the effect of the poison gas.

All of which may serve to explain why the corn cob pipe of yesteryear was so generally sniffed with suspicion.

Wife (trying on hats)—Do you like this turned down, dear?  
Husband—How much is it?  
Wife—Nineteen fifty.  
Husband—Yes, turn it down.

When Alaric set the ransom of Rome, in the year 409, he demanded as one item 3,000 pounds of pepper.

## Feel Young Again Enjoy Hard Work

Millions of men and women all over the world take Kruschen Salts daily—not because they are really sick, mind you—but because they know the little daily dose of Kruschen keeps them always fit, energetic and free from fat, and also keeps the system free from over-acidity.

People who take Kruschen Salts in a glass of hot water every morning won't have headaches, and are always free from constipation, depression, dizziness, coated tongue and unpleasant breath.

They have no pains in their system because the action of Kruschen Salts on the liver, kidneys and bowels causes perfect and regular elimination. If you want joyous health and glorious vigor—if you want to work hard and enjoy your work—try taking Kruschen Salts every day—millions of people are enjoying their daily labours, thanks to the "little daily dose" of Kruschen.

## Air Trip To Hudson Bay

### Aviators Make Successful Flight From Cochrane To Belcher's Island

The outstanding flight in Canada in the past several months came to a successful conclusion recently when Sam Sainsbury, Toronto mining man, and his two pilots got back to Cochrane from Belcher's Island in Hudson Bay.

The flight was made for the purpose of staking iron ore claims on Belcher's Island, and it was completed successfully in a total of nine days, including three days on the treeless and uninhabited island. Frank Fisher and Kelly Edmondson, of the National Air Transport, were the pilots who successfully handled the difficult trip without aerial bases or any facilities for repairs or shelter excepting what they had aboard the big Buhl air-seadan.

Pilot Fisher said their only trouble was a broken tail-skid. It was damaged in landing on the packed sea-ice on Belcher's Island. The near crack-up was serious enough, however, to have kept the expedition 600 miles from Cochrane for several weeks if it was not possible to make repairs.

"We repaired the skid with staking posts which Mr. Sainsbury brought with him to mark his claims. While he staked claims we fixed up the damage," said the pilot.

The trio enjoyed their adventure immensely, and report that the factors of the Hudson's Bay posts along the lonely east coast greeted them with open arms. It was their first contact with civilization since last autumn.

## Artificial Sunlight

### Has Proved Beneficial

#### Much More Healthful Than Sunlight In Smoky Cities

The latest efforts have been toward producing lamps that simulate sunlight. Lamps of this kind are already available, and, while they have been sold primarily for purposes of home treatment, they are beginning to be considered as sources of general illumination of the house as well.

There can be no question that the illuminating-engineer of the future will design lighting installations with the view of not only enabling us to see but also of keeping us healthy. From such artificial sunlight, no less benefit is to be expected than from midsummer sunlight—much more, in fact, than is obtained from summer sunlight in smoky cities and from winter sunlight everywhere in middle and higher latitudes.

Particularly in industry where workers are required to spend most of the daylight hours indoors and in offices where the biological effectiveness of natural light is practically lost, this type of lighting will prove of immense benefit. Power Plant Engineering.

Pevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

### Canada's Forest Resources

The latest available estimate places Canada's forest resources at 224,304 million cubic feet of standing timber which is capable of yielding 424,637 million feet board measure of sawn lumber and 1,121,993 thousand cords of pulpwood, ties, poles and other smaller materials.

Plenty of Minard's well rubbed in soon sets your right. Bathe the sore part with warm water before you start.

**MINARD'S LINIMENT**  
"KING OF PAIN"

## New Ship Salvaging Method

### Will Make Use Of Tides In Lifting Sunken Vessels

If ambition counts for anything, several of the 180 major ships wrecked in Alaskan waters, and even the "Lusitania" may be raised to the surface, with resulting recovery of fortunes.

Frank Curtis, a Seattle house mover, has dreams of great enterprises and huge fortunes nowadays as he prepares to lift the steamship "Islander," which sank with heavy loss of life and fortune in Stephens Pass, August 15, 1901.

He has signed a contract with E. H. and H. S. Wiley of Olympia, who already have recovered some gold from the sunken ship, but who hope to move the wreckage into shallow water, where it may be investigated more easily.

Curtis declared that after he completes the job, he may lay in a supply of ship salvaging equipment, and go into the business on a large scale, first attacking other wrecks in Alaskan waters, then swinging to other parts of the world.

He plans to let nature help him raise the "Islander" in this manner: He will use a diving bell to place cables under a ship, 20 to each side and leading to a barge 45 by 285 feet. Winches will clinch up the cables at low tide, and Curtis figures that the barge will lift the hull when the tide rises. This operation will be repeated, and the barge will be towed toward shore, until the sunken ship is dragged to shallow water.

The "Islander" was believed to have carried more than \$1,000,000 in gold dust and nuggets.

## Radio For Correspondence Courses

### Six Thousand Students Now Enrolled In Saskatchewan Correspondence Class

Approximately 6,000 students are now enrolled in the correspondence courses instituted last year by the Saskatchewan Department of Education. Five thousand of the enrolments are from rural districts. These correspondence courses are arranged to supplement the work being done in the elementary and secondary schools of Saskatchewan for boys and girls who, for various reasons, have been unable to attend school as much as they desired. If the young people are unable to go to schools, then the Department of Education intends that school facilities shall be taken to them. The provincial government proposes to supplement these courses next autumn by a radio school.

## Will Cultivate Estates

### Republican Government Of Spain Will Cultivate Land Formerly Used By Nobility

Spain's Republican Government has issued two decrees to enforce cultivation of land on the large estates formerly held by the nobility.

They create local committees empowered to order the owners of unutilized land to cultivate their property under instructions by the committees, as to the nature of the crops to be planted and the wages to be paid farm workers.

Primary consideration in this action, government spokesmen have said, is to relieve unemployment and to increase national production.

Persian Balm is inevitably chosen by discerning women. Delightful to use. Subtly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the child and is excellent for the father as a hair fixative and cooling shaving lotion.

## Favorite Authors

### Three British Writers Among the Most Popular Authors In U.S.

Three British authors rank among the most popular story writers in the United States, in the opinion of the readers of a United States magazine. For the past year the magazine has offered a prize each month for the best essay on "My favorite story, and why." The result shows that O. Henry is easily first in the popular taste. Rudyard Kipling is second. Two other British authors, Katherine Mansfield and Robert Louis Stevenson, are fifth and sixth respectively. The other most popular writers are Edgar Allan Poe, who ranks third, and Guy de Maupassant fourth.

## Radio For Lifeboats

A small and complete radio power plant has been perfected for use in lifeboats. Designed to be part of regular lifeboat equipment and always ready for use, the small self-contained radio station generates 400 watts, which is sufficient power to send short-wave distress signals 1,000 miles. It will operate five hours on a gallon of gasoline.

The fellow who shakes the tree doesn't always get the most fruit.

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: After many adventures during the war zone in China, Captain Jimmy and Scottie got lost in the dark and land in enemy territory. The camp was in an uproar. One fat fellow stood in my way, but that donkey just butted him in the belt, and he landed kerpunk on the side of a tent. After that we galloped off into the night before anyone could saddle a horse.

Up the valley, I found a cliff with sharp edged rocks. Working close to it, I began to rub the ropes which bound my wrists, on the rough surface. Then lights began to twinkle here and there in the valley, as the bandits set out to hunt for me with torches. Five minutes, ten, fifteen. I rubbed those tough ropes, while the lights came nearer, then that as I had given up hope—they snapped and I was free!

My arms were so numb that I was almost as helpless as a baby. Up and down the valley bobbed the torches—and each torch was carried by a man-hunter. I edged close into the cliff, while the feeling gradually came back into my hands.

Fortunately for me, no one came near my hiding place. Whenever a bandit's torch went out, he would make a dash for camp, so as not to be left alone in the darkness. Probably he was afraid of the dragon jumping on his back, and flying away with him to its den. Anyhow, the torches went out one by one, and the search ended for the time. Soon the camp quieted down. Sentries paced to and fro, but as the night wore on, even these huddled close to the dying camp fires, and dozed in the full light.

Just the ideal time for a raid! No one would ever expect a prisoner to suddenly attack a camp full of armed men. Cautious! I edged close into the tent.

(To Be Continued.)

children pulled us with soft mud. But finally my turn came. Suddenly I dug my toes into that burro and charged the mob. He howled several over, and in a moment the camp was in an uproar. One fat fellow stood in my way, but that donkey just butted him in the belt, and he landed kerpunk on the side of a tent.

After that we galloped off into the night before anyone could saddle a horse. Up the valley, I found a cliff with sharp edged rocks. Working close to it, I began to rub the ropes which bound my wrists, on the rough surface. Then lights began to twinkle here and there in the valley, as the bandits set out to hunt for me with torches. Five minutes, ten, fifteen. I rubbed those tough ropes, while the lights came nearer, then that as I had given up hope—they snapped and I was free!

My arms were so numb that I was almost as helpless as a baby. Up and down the valley bobbed the torches—and each torch was carried by a man-hunter. I edged close into the cliff, while the feeling gradually came back into my hands.

Fortunately for me, no one came near my hiding place. Whenever a bandit's torch went out, he would make a dash for camp, so as not to be left alone in the darkness. Anyone desiring photo of Captain Jimmy, write to Captain Jimmy, 2010 Blair Building, Toronto.

## Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. Pound and half pound tins at your grocers.

## Russia's Armed Youth

### Soviets Molding Boys Into Form Approved By Communists

In Soviet Russia every youth is being taught to bear arms. At the same time he is being molded by effort of instruction and discipline into the form approved by fanatic communism. Every source of information of other ideas or ideals is being shut off from the mind of Russian youth. The result must be the preparation of an army of narrow fanatics, unquestioning, uninformed, hostile to all the outside world.

In Fascist Italy somewhat the same process is going on. If Fascist youth is not shut off as completely as the youth of Russia from outside realities, it is being intensively trained in Fascist ideas under cover of a censorship which discourages and suppresses criticism and inquiry. At the same time it is being armed and disciplined as a military body.

## Train Crew Still Faithful

### Cares For Grave Of Boy Who Was Conductor's Friend

Even residents of Elrod, South Dakota, have forgotten the name of the boy who is buried beside the Northwestern Railroad tracks near there, but periodically a passenger train stops and the crew cares for the grave. For several years the boy stood by the tracks each day, watched the train pass and waved to William P. Chambers, the conductor. The boy died. Chambers made a pilgrimage weekly to the grave, keeping it in condition and planting flowers. The boy's parents moved away, but Chambers continued his visits. The conductor's last request before he died recently was that the grave be not neglected. Martin Redmond, who succeeded Chambers as conductor, stopped the train at the grave and placed a wreath on the mound.

## Tallest Building In World

### Empire State Structure In New York Contains 86 Stories

The world's tallest structure—the Empire State Building—has been dedicated and opened in New York—a final realization of the long labors of former Governor Alfred E. Smith and a group of millionaire business associates.

The new structure stands at Fifth Avenue and 34th Street on a site formerly occupied by the old Waldorf-Astoria Hotel.

State and city dignitaries, leaders of industry and of the city's professional and educational life participated in the dedication of the 86-story, 1,200-foot building and its dirigible mast towering another 16 stories into the sky.

## Central Heating Development

Six hundred men are employed in the new central heating development of the Northern Public Service Corporation, at Winnipeg, says a report of the Industrial Development Board of Manitoba. The payroll runs to about \$20,000 weekly.

## Little Helps For This Week

"Not that we are sufficient of ourselves to think anything as of ourselves; but our sufficiency is of God."—2 Corinthians III. 5.

Leaning on Him, make with reverent meekness,

His own thy will, And with strength from Him shall thy utter weakness.

Life's tasks fulfill.

—John Greenleaf Whittier

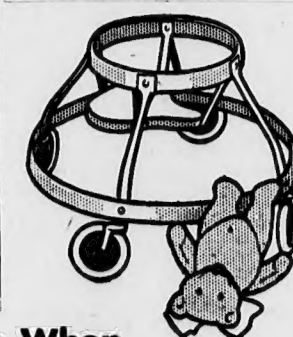

Most beautiful when the strength is one of humility instead of pride, and the trust no more in the resolution we have taken, but in the hand we hold.—John Ruskin.

Let me truly feel, that in myself, I am nothing, and at once through every inlet of my soul God comes in and is everything to me. And as soon as I feel this, the almightiness of God pours through my spirit like a stream, and I can do all things through Him that strengthens me.—William Mountford.

For treatment of caked bags in cows, or garget, use Douglas's Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blemished stock.

Nothing will blind a man so effectively as throwing gold dust in his eyes.

Imports of linen piece goods into China last year were nearly double those of 1929.

## When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

**Fletchers CASTORIA**

## Town & District

Ed Taylor insurance agent—Do you want a straight life?  
W. H. Ferguson—Well I like to step out once in a while.

For good home made meals, light lunches, refreshments of all kinds ice cream, visit the Rose Tea Room.

It seems that any man who makes his home in Gleichen and does not belong to the Gleichen Board of Trade is not interested in the town—can non members deny this?

Dan McDonald has at last got his new roofing laid on his blacksmith shop and is tickled to death over it. Dan says he wants to see a down-pour of rain to test his roof. J. J. Robinson laid the roofing.

Austin Brown and his sister Miss Brown of Queenstown were in Gleichen visiting for a few hours Friday.

M. Murray, Town of Gleichen secretary-treasurer last week sent out the tax notices for 1931. The reduction in taxes put joy in the hearts of all.

High school examinations started Tuesday.

Rev. V. M. Gilbert of Rockyford has accepted a call to the United Church of Canada, Gleichen. Mr. Gilbert and family should be quite an asset to our town. The whole family are musically inclined so we may expect some real musical entertainments in the future.

Rev. C. R. Corcoran has accepted a call to Three Hills and leaves July 1st.

Bassano and Brooks golfers will be here next Sunday.

Mrs. L. Cuthbert entertained at bridge last Friday evening in honor of Mrs. Lockyear.

Under the auspices of the Ladies Circle, a sale of Home-cooking and Strawberry festival will be held in the Gleichen Pharmacy on Saturday afternoon, June 20th, from 3 p.m. to 6 o'clock.

L. R. McIntee, who for several years was oil agent in Gleichen and is an agent for the oil company in Brooks has been appointed head of the Brooks fire department. He keeps the fire boys on their toes with fire practices.

Toronto's mayor recently advised the city's business men and firms to give no printing jobs to printers outside of Toronto. When a Toronto printing firm asks you for a job be as loyal to your home town as Toronto's mayor and this also applies to Calgary printers.

Kerosene and lubricating oil took a drop in price last week.

Rev. J. R. Davies and family leave Friday for Banff where Mr. Davies will preach in the Anglican Church this Sunday.

Mr. and Mrs. J. M. Cameron of London, Ontario will be in Gleichen July 1st renewing old friends. Most people will remember Mr. Cameron when he was manager of the Bank of Commerce here.

The ladies of St. Victor's Church will hold a Home-cooking sale on the 27th of June in the afternoon and evening. Everybody welcome.

The 22nd Battery boys held their picnic at Sarcee Camp Sunday and all report having enjoyed themselves very much. It was a day of real sport.

The Gleichen boys lost the soft ball game but won the tug-of-war. Walter Bogatie won the biscuit race. The girl who brought him the biscuit got the prize box of chocolates and Walter never saw them or got a taste. He will never go near those selfish Calgary girls again. He has one consolation he eat the biscuits. Coming home flat tires, running out of gas, radiators had to be filled times without number was the rule. Also one cylinder head was cracked.

Mr. and Mrs. F. E. Pobst have received the school report of their son David who is attending high school at Seattle, Wash. It shows he passed his five subjects with a score of five A's and was the only one in the 1932 class to pass with a perfect score. There are nearly 2,400 students in the school and we presume his 1932 would be one fourth of this number. David has been given the assistant secretaryship of all the clubs in the school, with a salary, and the work he will do will give him credit in his school work. He has the latest book keeping machine to operate and considers this one experience he cannot pass up. We congratulate David on his success.

The big event in the Canadian political world was the presentation to Parliament last week of the financial budget of the year and the tariff changes by which it is hoped to provide for the heavy deficit shown by the statement of the Finance Minister. The new provisions of the Tariff for the first time in upwards of forty years decidedly protective. Not since the days of Sir Charles Tupper and his partial compilation of Sir John A.

Donald's so called "National Policy" has such a drastic upward revision been made. Whether successful or otherwise we are pleased to see the principle which has been the pet subject of Grit and Tory discussion for upwards of a generation given a fair and earnest trial the controversy so long on a theoretical basis sitting at rest by experience.

Dean Aberhart will conduct Baptist services in Gleichen next Sunday, and after the service he will organize the Gleichen Baptist Church. Seventeen Gleichen people attended Prophetic Bible Institute Church in Calgary Sunday and fourteen were baptised by Dr. Imrie. The following is a list of those baptised: Mrs. Hamar, Miss M. Hamar, Miss M. Bolinger, Miss Gladys Wilson, Mrs. Nicholson and four children. Mr. A. Prowse Mr. and Mrs. Sid Prowse and Mr. Mrs. R. Prowse.

The fifteen thousand enumerators who have been engaged since June 1st in taking the Population Census have also been making a record of the name and address of every retail and wholesale establishment in the Dominion. These names are to be the basis for the Postal Census of Merchandising and Service Establishments. It will be some weeks before all the lists are in the hands of the officials in the Dominion Bureau of Statistics. When they have been carefully scrutinized and certain other preliminary work done, schedules will be mailed to each retail wholesale establishment. It is expected that somewhere between 150,000 and 200,000 names will be received and, though a very great amount of preparatory work is necessary before schedules can be mailed, it is expected that they will be sent out in August.

Miss Ella Robinson has returned from Calgary for the summer.

"All the twenty cent wheat has been planted now and most of it up and thriving. Ten cent oats and eight cent barley are still being sown," says the Vegreville Observer. We wonder what value The Observer places on a million dollar rainfall!

—The frogs have begun to sing. What more welcome sound to the heart and soul than the tuneful melody of the little nocturnal, aquatic webfoot troubadour? The meadow lark for the fields and the robin for the back yard, but for energetic whole-souled crescendo, for care-dissipating, debt-forgetting enjoyment give us the frog!

Andrew Park the youth who stole the three pies from the Rex Cafe in Gleichen about three weeks ago was allowed his freedom by the appeal court after being sent down for six months by Magistrate Davidson of Calgary.

Judge Wm. McConnel has been busy these days holding courts at Hussar and Bassano while Magistrate Bond of Bassano, is on his holidays.

In the long list of accomplishments to the credit of modern medical science perhaps none has a greater significance than the success attained in the reduction of childhood death.

Queen Anne of England, borne in 1664, bore 17 children, only one of whom lived more than year, and he died at the age of 11. Now large families of children often mature without a death.

Through medical education and the treatment of early defects the child's chance of reaching maturity has been greatly increased, especially during the last half century. The lengthened average span of human life which now prevails is largely due to reduction of mortality among infants.

In addition to regularly employed physicians and nurses by public health units, thousands of volunteer workers are cooperating in the noble task of saving babies' lives.

For their effective efforts in this and other directions looking to the preservation of human life the medical profession and those cooperating are entitled to the highest praise.

### CARD OF THANKS

Mrs. Hilda Taerum and family and Mrs. Henry Olsen wish to express their heart felt thanks for the many kind expressions of sympathy and floral tributes received during their recent sad bereavement occasioned by the passing of the late, Guttorm Taerum and Henry Olsen. Also old neighbors and friends, for their many kindnesses.

### NOTICE

There must be no tampering with anything in connection with the reservoir. Parents notify children to leave everything alone.
